

If you are thinking of becoming an actor or actress in Nigeria, think twice 🙄. From ongoing reality, actors/actresses do not matter.

They give in their best to deliver great acting that not only entertains but inspires, become popular, get fans but then, almost always end up as nobodies, lonely, sick, dies and nobody gets to know why and how or show any concern.

The Nigerian movie sector seems to be riddled with "untold evils" that has rendered it a kind of "jungle" where "dogs eat dogs" and other animals just doesn't care 🤒.

As a content creator, joining Nollywood or any Nigeria any movie industry currently seem as a "stupid" goal cos it adds zero benefits, zero profits, but increased problems, increased costs and increased personal and industry demons that not only attacks your career but your life.

You can count how many actors and actresses, popular celebrities, phenomenal figures on their own right, that died miserably, including many others that are currently in untold misery and pains without help 🤒

Very soon, if not already happening, actors and actresses in Nollywood and other Nigeria movie industry would rather be pitied and mocked when spotted in public instead of celebrated and respected 🙄.

Viruses that are eating up Nigeria entertainment industry really fast includes:

1. Rotten leadership
2. Unholy practices left unsanctioned
3. Zero welfare
4. Wicked competition that leads to innovation of new evils and wickedness instead of new technologies and methodologies that bring positive impacts.
5. Negative ulterior motives.

6. Selfish political romance by so-called leaders of the industry

7. Selfish politicians and political leaders

Rest in peace to all deceased actors and actresses, recent being #RoseDiamond.

Prayers to all others who are struggling and in pains and helplessness.

Appeal to the government to care for their institutions, sanitize, protect and empower institutions for strengths. It is strong institutions that advances a Country or State, making it a force to be reckoned with.
